

Blank plant-trial planning worksheet

Print and complete this worksheet with your QC team. It is a planning aid, not a test report, sample QC export or authorization to release concrete. Keep completed records within your plant's approved system.

Planning item	Plant notes / agreed requirement
Plant, bed / member and trial dates	
Trial question and current production baseline	
Mixture ID / revision and calibration record	
Sensor locations and reference method	
Cylinders: preparation, curing and break schedule	
Proposed equipment, network and power	
Applicable specification and required approvals	
Measurement and tracking acceptance criteria	
Required QC fields, exports and retention	
Missing-data / interrupted-test procedure	
Installation, training and support responsibilities	
Trial cost, consumables and recurring charges	
QC reviewer and release authority	
Review date and expansion decision criteria	

Planning aid only. Complete with the responsible plant team.
